Airworthiness Certificate	Weight and Balance Data	Limited Warranty
		Accessories Kit

2020 Appearance Options (+\$7,500)

The newly designed Velocity and Pursuit appearance options bring an even sportier feel to sport flying. Striking in their own differences, these exterior options deliver an additional level of personalization for new owners.

Velocity

Embodying the bold and uncompromising mission of the ICON A5, the Velocity Appearance radiates sharp lines and angles to accentuate the A5's state-of-the-art design. Assertive color combinations and a distinctive grey nose deliver the most distinguished look yet for the A5.

Pursuit

Inspired by the A5's automotive and powersport design roots, the Pursuit Appearance brings classic racing style to a next-gen aircraft. Subtle abstract patterns embolden the otherwise sleek livery, paying artful tribute to the A5's racing DNA and the culture of Adventure Flying that it created.
